It is a bot. Ğ1 wallet that works directly in Telegram.

G1 Super Bot

Created by @Kapis123

DLiuQaM8r8YF3S97hFPY4gKosEnYpnUsSRSQKn2353NW

[Es] Este bot crea un monedero simple en junas (Ğ1) para intercambiar en los encuentros. Ideal para baja conectividad o gente nueva ya que no requiere descargar una app o recordar contraseñas.

[EN] This bot creates a simple wallet in Ĝ1 to use in the street. Ideal for low connectivity or new people since it does not require downloading an app or remembering passwords.

START

Start the bot

Search Telegram g1superbot.

21

Open it and press start.

22 LANGUAGE

Select your language. Later you can change it through the "Settings" button, if you wish.

Pın your key

ED

Your key and **QR code** will be generated automatically.

Activate the context menu to **pin your key** and always have it at hand. Change name

04

Add a profile to your account, so recipients know where the payment is coming from.

Click on the "My Account" button and then on the "Change Name" option

Write your name (it is recommended that if you are already a co-creator match the pseudonym you have in Cesium)

Verify your name

Paste your key and choose the "Profile Details" option to verify that it has been correctly created.

3 Open Cesium and from the "Directory" option look for the name you have put in Ğ1SuperBot to verify that it is linked to the corresponding key. But first make sure you have a Cesium+ set up that works well. On this website ginspecte you will find some servers.

If you're a co-creator and you've given Ğ1SuperBot the same name as your pseudonym in Cesium, you'll make your search easier.

25 Button "My Account"

My Public Key: Show your key and QR code.

My transactions: Displays a list of the latest transactions.

My Balance: Shows the balance you have available.

Change Name: Add a name to your cesium+ profile, so recipients of your junes know who sent them.

26 "Pay" button

 Click on the "Pay" button
In case the receiver of the payment also uses
G1Superbot and does not have the QR code printed, suggest that he can see it from the option "My account", "My public key".
Click attach

Click on the buttor to take a photo.

Focus on the QR code of who you are going to make the payment.

Tap for photo, hold for video

0

5

Click Submit

The bot will show you the key that corresponds to the QR code you scanned.
